

Guidelines for Crust Grants Program Badge

Welcome to the Crust grants program!

As part of the program, we want to help winning teams acknowledge their grants publicly while observing the foundation's guidelines.

To that end, we've created a badge for grant-winning teams. The badge will be available for [download](#). Before you begin using the badge, please note the following points:

- Grants are awarded for specific projects, not to teams in general as a blanket endorsement.
- Crust and its grants program don't broker partnerships or joint ventures; or cosign wholesale any external team's work. Bearing that in mind, **the badge should only be displayed in project-specific contexts**.
- Please do: display the badge in a GitHub repository that contains code connected with the grant-winning project; on any project-specific webpages; and, when appropriate, in a tweet or blog post announcing your grant in a project-specific context.
- Please don't: display the badge on your team's landing page; add it to any social media profiles; or use it in any contexts that could misrepresent your relationship to Crust.
- In case of any questions, please don't hesitate to reach out to us.
